

## Moser Baer emerges as the 1<sup>st</sup> Solar PV Company from India to achieve 100 MW of installations globally '*under its own brand*'

- With an order book visibility beyond Rs 1200 crores mark in the next couple of years, PV business of Moser Baer is poised to lead the country's solar mission.

**New Delhi, December 08:** PV Business of Moser Baer India has attained the distinction of becoming the first Indian Solar PV company to successfully achieve more than **100 MW solar installations** globally. These modules are widely bankable with leading banks and financial institutions across the world, making Moser Baer one of the preferred solar brands for the Solar Farm developers. The modules are specifically designed to generate optimum energy from sunlight which can withstand severe climatic vagaries over a period of **25 years**.

Speaking about the major achievement, **Ratul Puri, Executive Director, Moser Baer India**, said: "This is indeed a moment of pride to be the only Indian solar PV company to have installations of over 100 MW globally. This achievement motivates us to put our global expertise to domestic use and help give a fillip to the nation's solar mission. It is notable that MBSL has provided Thin Film modules towards the commissioning of **country's largest solar farm** in Tamil Nadu."

Moser Baer already has the distinction of commissioning the first of its kind 1 MW thin film solar farm in Maharashtra and one of the largest residential roof-top Solar PV installations in Surat. These modules are customized to suit the area of its implementations like residential, commercial or for industrial purposes.

MBSL's expertise in the solar photovoltaic space is well-manifested in its various installations around the world (Germany, Italy, India, UK, US, Japan, Slovakia, France, Australia et al.). The solar arm of Moser Baer is currently the largest multi-technology PV manufacturer in India thereby providing customers with suitable options for their needs.

#### **About Moser Baer Solar Ltd.:**

*Moser Baer Solar Ltd. (MBSL) and Moser Baer Photovoltaic are subsidiaries of Moser Baer India Limited. These entities were launched between 2005 and 2007 to manufacture world-class solar modules and provide EPC solutions for effective deployment of PV Systems. Modules for crystalline silicon and amorphous silicon (thin film) are manufactured using premium quality materials and cutting edge technology for residential, commercial, industrial & custom applications for both on-grid and off-grid use. The PV Systems business has rapidly grown to a market leadership position in solar farms, roof-tops and off-grid applications in India. The business strategy is to straddle multiple technology platforms and to drive scale in a cost effective manner. The current production capacity is **90 MW of Crystalline Silicon Cells, 100 MW of Crystalline Silicon Modules, and 50 MW of Amorphous Silicon (Thin Film) Modules**. The strong commitment to R&D and innovation has resulted in manufacturing of cutting edge PV cells and modules that meets the international standards including UL, IEC, ETL, CE. MBPV is the first ever solar company globally to be awarded the prestigious 5 Star rating by TÜV Rheinland for maintaining highest standards of quality.*
