Moser Baer Solar Limited powers its biggest rooftop installation in Japan

- Supplies **465 KW Crystalline Silicon modules** to La Salle towards commissioning of a large rooftop installation in Japan.
- Has supplied more than 2800 KW Crystalline Silicon modules to other Japanese players for installations in Japan in last 6 months

New Delhi, February 15, 2011: Moser Baer Solar Limited (MBSL) the leading player in the Indian solar market was yet again part of a landmark achievement, this time in Japan's solar market. MBSL provided, its globally acclaimed **TUV Rheinland certified, 465 KW** Crystalline silicon (c-Si) solar modules to La Salle, a leading real estate investment management company in Japan towards commissioning of rooftop solar installation on its warehouses. Apart from this, **MBSL has supplied more than 2800 KW** modules making it one of the important non-Japanese suppliers of solar modules in the very demanding Japanese market which is dominated by the Japanese brands like Sharp, Sanyo, Kyocera, etc.

MBSL has been exporting about 90 % of its production to over 32 countries across the globe under its own brand in last 3 years. With the booming Indian solar market, MBSL will now focus to develop the domestic market. In addition to the large part of its 50 MW Thin Film capacity, the Company will now allocate a significant portion of its expanded 200MW capacity of Crystalline Silicone capacity to meet the domestic market requirement. These initiatives will help meet the requirements emanating out of National Solar Mission and States led solar policies domestically.

Speaking about this major achievement and Company's solar thrust, **Vivek Chaturvedi, Senior Vice President, MBSL**, said: "Having proven ourselves in demanding markets like Germany, Italy, France, UK, Japan etc, we believe it is the right time to extend our global expertise to nurture the growth of Indian solar industry. Our expanded capacity and global experience will play a key role in the country achieving its ambitious target set in National Solar Mission."

About Moser Baer Solar Ltd.:

*Moser Baer Solar Ltd. (MBSL) and Moser Baer Photovoltaic are subsidiaries of Moser Baer India Limited. These entities were launched between 2005 and 2007 to manufacture world-class solar modules and provide EPC solutions for effective deployment of PV Systems. Modules for crystalline silicon and amorphous silicon (thin film) are manufactured using premium quality materials and cutting edge technology for residential, commercial, industrial & custom applications for both on-grid and off-grid use. The PV Systems business has rapidly grown to a market leadership position in solar farms, roof-tops and off-grid applications in India. The business strategy is to straddle multiple technology platforms and to drive scale in a cost effective manner. The current production capacity is **90 MW of Crystalline Silicon Cells, 100 MW of Crystalline Silicon Modules, and 50 MW of Amorphous Silicon (Thin Film) Modules**. The strong commitment to R&D and innovation has resulted in manufacturing of cutting edge PV cells and modules that meets the international standards including UL, IEC, ETL, CE. MBPV is the first ever solar company globally to be awarded the prestigious 5 Star rating by TÜV Rheinland for maintaining highest standards of quality.*
