## PRESS RELEASE

### For immediate release:

#### **Moser Baer Solar allocates 10 MW of Elite series modules for rooftop installation in Delhi & U.P**

- Allocates upto 10 MW for rooftop installation in Delhi & UP
- To use its proven Elite series modules that is certified for use in highly quality conscious Japanese market

New Delhi, June 25, 2014: Going by the power crisis and the focus of the government to provide uninterrupted 24\*7 power supply, Germany has shown the world importance of roof top and now Japan and US are aggressively promoting rooftop installations. Moser Baer Solar has considered 10 MW of modules for rooftop installations in Delhi & U.P. Moser Baer Solar has earmarked the quantity from its Elite series modules which has been acclaimed in the quality conscious Japanese market. The company is geared to enhance supplies further. Any customer opting for rooftop installations in these cities would be accorded priority and get the required supply. The 1 MW of rooftop installation would be able to generate approx. 16,00,000 units of power which could cater to almost 1066 households in a year considering 1500 units of consumption through the year.

**K.N. Subramaniam, CEO, Moser Baer Solar Ltd.** talking about the initiative said, “We welcome the focus of the government in promoting rooftop installations too. Considering the Transmission and Distribution (T&D) challenges, rooftop installation would be a safer bet for people. Individuals will have both the options of using solar for day time requirement and 24\*7 by adding batter back system in the same. The idea behind allocating up to 10 mw is to speed up and fast track the roof top installations in these cities which are facing huge power cuts. And

we have chosen to block elite series modules which are very popular in Japan to ensure high quality performance.

We also appreciate that the Government's commitment towards the manufacturing sector in India and is set to follow the precedence set by the EU and US in implementing the anti-dumping duty recommendations made by the Ministry of Commerce on the basis of high levels of injury incurred by domestic players on account of such dumping. One must consider, any change in position will prove highly detrimental to the entire manufacturing sector in India."

### **About Moser Baer Solar :**

Moser Baer Solar Ltd. (MBSL) is a subsidiary of Moser Baer India Limited. The entity was launched in 2007 to provide EPC solutions for effective deployment of PV Systems. Today, MBSL is a key player in manufacturing world-class solar modules and supplying to customers across India, Europe and Japan. In addition, MBSL also provides EPC solutions for effective deployment of PV Systems and has recently emerged as the largest solar EPC player in India with more than 250 MW of installations across the length and breadth of the country. The PV Systems business has rapidly grown to a market leadership position in solar farms, roof-tops and off-grid applications in India. The business strategy is to straddle multiple technology platforms and to drive scale in a cost effective manner. MBSL was conferred with the prestigious "5 Star Rating" certificate by TÜV Rheinland for maintaining highest standards of quality in manufacturing for three consecutive years ( 2009- 2012)
